

video controller 207 via the data link 220. Thus, *a user interfacing with one of the plurality of receivers 206 is able to modify the frame size, frame rate, compression algorithm, and other parameters of the incoming stream of video images to one of the plurality of receivers 206.*

Since the plurality of receivers 206 and the transmitter 201 are preferably located in remote locations, by interfacing with the video controller 207, *the user is able to remotely control video parameters such as frame size, frame rate, compression algorithm, and the like which are included within the video settings 211 at the transmitter 201.*" (emphasis added).

48. The specification discloses a compressor using a lossy compression method and a compressor using a lossless compression method. The specification further taught remote selection or changing of the selection of the compression method.

## **II. Reconsideration Requested**

49. The undersigned respectfully submits that, in view of the foregoing remarks, the rejections of the claims raised in the Office Action have been fully addressed and overcome, and the present application is believed to be in condition for allowance. It is respectfully requested that this application be reconsidered, that these claims be allowed, and that a Notice of Allowance is respectfully requested. If it is believed that a telephone conversation would expedite the prosecution of the present application, or clarify matters with regard to its allowance, the Examiner is invited to call the undersigned at 408-739-9517.

Respectfully submitted,

**Kendyl A. Roman**
